

HARDWARE

# TNC 4000

## FLEXIBLE SPEED ROBUST

TNC 4000 controller provides unprecedented fingerprint identification solution for both Access Control and Time and Attendance applications.

It can support a wide range of Enterprise client. Match Enterprise client to TNC 4000 controller to suit your building requirement & facade.

Its powerful processor provides a very high matching speed and identification. With a built-in ethernet and USB interface, SD slot for fingerprint template capacity expansion, Wiegand output to cater for any third party controller. The possibilities is endless.

### Features

- Support 1 Enterprise Client
- Flexible
- Dimension : 135mm x 115mm Weight: 0.2kg
- Easy to set up
- Build-in ethernet connectivity
- Supports Wiegand interface
- Supports up to 6 fingerprints per ID
- Stores 100,000 event logs
- Supports time zone for access control
- 1: N matching available
- Configurable ID length (3-10)
- Supports multiple factor authentication with any of these factors i.e. ID, PIN, Card and fingerprint.

### Applications

- Time and Attendance and control access to computer server room, safe deposit room, remote power station, research and development laboratory.
- Personnel verification
- Prevent unauthorised access control
- Prevent "buddy punching" or "ghost employee"
